

# ProCulture® Shaker Flasks

Ideal for the growth of cell cultures through enhanced agitation, ProCulture® shaker flasks come with baffles spaced at 120° intervals for increased gas transfer to the culture medium when used on a shaker. Manufactured from Type 1, Class A Borosilicate glass, they are autoclavable and environmentally sustainable when compared to disposable plastics.

## ProCulture® Delong Shaker Flasks

- Long neck reduces risk of splashing that could reach the closure
- Designed for polypropylene and stainless steel closures
- No baffle option available for applications requiring less oxygenation

Catalog No.	Capacity	O.D.	Height	Neck O.D.	Baffle Style
